EDUCATION

St Joseph Engineering College, Mangaluru	2023 – 2027
B.E. in Computer Science & Engineering CGPA: 8.66 (Up to 5th Sem)	
Morarji Desai Residential PU College, Chikkamagaluru	2022
PUC (PCMB) Score: 86.5%	
Morarji Desai Residential School, Jodihochihalli	2020
SSLC Score: 82.56%	

PROJECTS

SigmaGPT | React.js, Node.js, Express.js, MongoDB, OpenAI API

- Developed a full-stack conversational AI interface using the OpenAI gpt-4o-mini API to stream response payloads.
- Structured a custom mongoose schema to support nested message subdocuments under session-specific threads.
- Built a global state system using React Context API alongside custom hooks for simulating word-by-word streaming.
- Integrated react-markdown and rehype-highlight to compile markdown responses with clean syntax highlighting.

ConnectMeet | WebRTC, Socket.IO, React.js, Express.js, Material-UI

- Engineered a real-time peer-to-peer video conferencing application supporting live audio, video, and text overlays.
- Built a high-performance Socket.IO signaling server to coordinate WebRTC SDP exchanges and ICE candidate handshakes.
- Handled dynamic room states, participant join/leave events, and message broadcasting on a Node.js backend.
- Designed a grid meeting workspace using Material-UI components and browser navigator.mediaDevices stream APIs.

CareerLink | Next.js, Redux Toolkit, Node.js, MongoDB, PDFKit

- Developed a professional networking portal supporting interactive user profiles, connection requests, and posts.
- Implemented a backend profile exporter utilizing pdfkit to compile dynamic database profiles into downloadable PDFs.
- Managed user connection request states (pending, accept, decline) and post interactions using Redux Toolkit slices.
- Integrated Multer middleware for secure file upload pipelines and structured complex Mongoose database associations.

Wanderlust | Node.js, Express.js, MongoDB, Mapbox, Cloudinary

- Built a RESTful travel listing web application following the MVC pattern with EJS-Mate layouts and Method-Override.
- Integrated Mapbox SDK for forward-geocoding locations to plot coordinates dynamically on interactive maps.
- Configured Cloudinary cloud storage via Multer with dynamic URL transformation pipelines for optimized image scaling.
- Secured route endpoints using custom Passport.js authentication, ownership authorization, and server-side Joi validation.

TECHNICAL SKILLS

Languages	Java, JavaScript (ES6+), Python
Frontend	HTML5, CSS3, Bootstrap, Tailwind CSS, React.js, Next.js, Redux Toolkit, Material-UI
Backend & Databases	Node.js, Express.js, MongoDB (Mongoose), MySQL
Core CS Concepts	Data Structures & Algorithms (DSA), OOP, DBMS, Operating Systems, SDLC, System Design Basics
DevOps & Tools	Git, GitHub, GitHub Actions (CI/CD), Docker, Kubernetes, Socket.IO, WebRTC, RESTful APIs

CERTIFICATIONS

- Data Structures & Algorithms – Apna College
- MERN Stack Development – Apna College

ACHIEVEMENTS

- LeetCode Problem Solver:** Actively solving algorithmic challenges (leetcode.com/u/charannnaik/) to build strong analytical skills.
- Technical Adaptability:** Built and integrated WebRTC signaling, OpenAI API wrappers, and pdf generation across diverse project stacks.
